

STEM Education for Sustainable Development

Josianne Guay | CSSC Mercier | Whitehorse | Canada

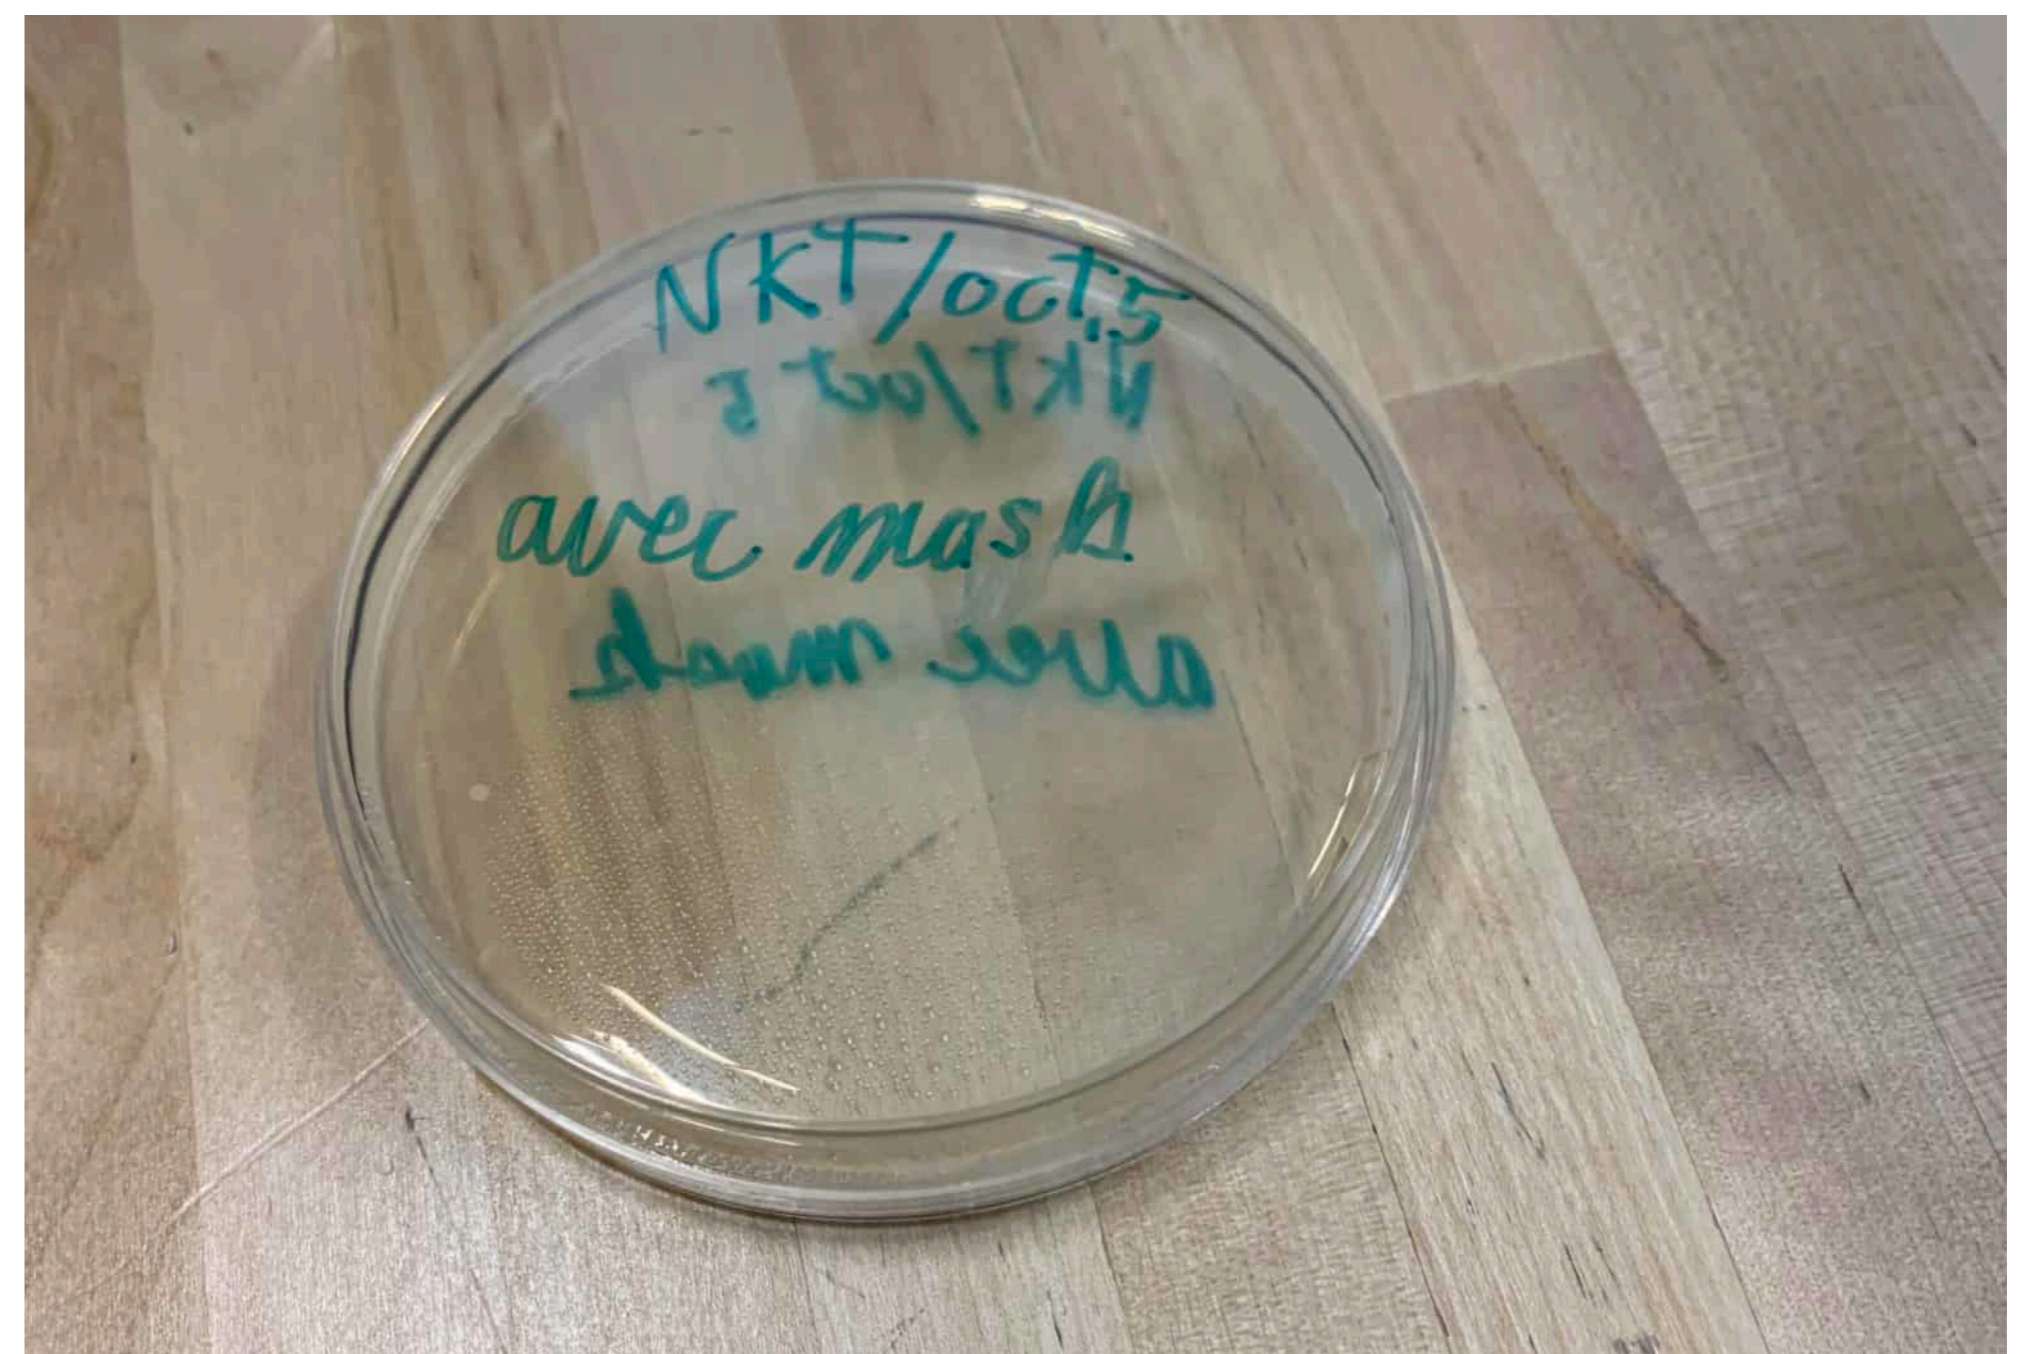

Understanding the World We Live in, One Cell at a Time

This **multidisciplinary didactic sequence** built around **inquiry-based learning** and **outdoor education** allows the students to discover **biology** while developing **key competencies**.

SCIENTIFIC LITERACY SKILLS

CRITICAL THINKING

AWARENESS OF OUR ENVIRONMENT

The benefits of teaching **literacy skills** in the science classroom are significant.

- Better **understanding** of the content
- More **efficient communication**
- **In-depth connections** between concepts

When students are **actively involved** in the learning process and are given the **strategies** as well as the **opportunities** to discover the world around them, they accomplish wonderful things!
