

Lauttasaari High School for International Business | Helsinki | Finland

The Sustainable Society of the Future

Theme Period for High School Students

WHAT?

The theme period of seven weeks is a module of six courses: Economics, Ecology, Making the Future, My Research, Sustainable Business and Life Skills.

HOW?

Students design utopias, prepare ecological studies and recognize their strengths and future prospects of companies, which help students to develop their own studies and business ideas. Students study e.g. in university's biological station and have excursions in companies.

WHY?

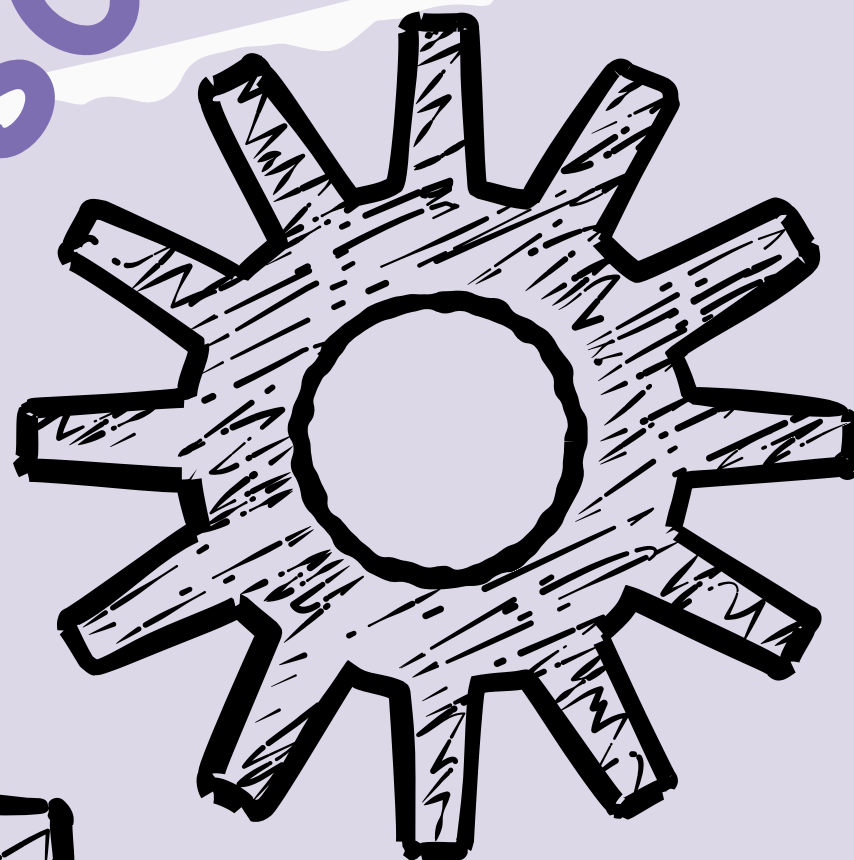

The aim is to study the disciplines of society and ecosystems in practical way to demonstrate how entrepreneurship affects the state of the environment and species and how the environment enables the profitability and business opportunities.
