Mathematics for crafts lessons

Learning material for the integration of mathematics and craft teaching

- Mathematics and crafts - these subjects have a lot in common!
- There are many ways to integrate mathematics and crafts
- MY IDEA:

↳ bring mathematics to crafts lessons

↳ make mathematics more approachable

↳ show how much mathematics you need in crafts

I graduated from the University of Helsinki in 2022 as a teacher for mathematics and crafts. In my studies I noticed how much these subjects have in common and that caught my interest. I have created a learning material for teachers on how to include mathematics in the crafts lessons.

I believe it is possible to bring mathematics to your crafts lessons!
