The GLOBE program and sustainable development

The **GLOBE program (Global Learning and Observations to Benefit the Environment)** is an international program for observing the Earth, with the support of the American agency NASA and connects students, teachers and scientists.

The program promotes teaching and learning about **science**, improves **environmental literacy**, raise awareness of the importance of **environmental protection**, and promotes **scientific discovery**.

For more information scan the QR code for GLOBE Home Page

Young people are our future. They will need knowledge to preserve life on earth. They can learn about the current situation by **observing** the Earth's surface and **collecting data**. Knowledge is the key to **finding sustainable solutions**.
